

Edit Alert(s)

1. Click the “Alerts” icon on the toolbar
2. Select the alarm to be edited
3. Click on “edit” button
4. Type and/or select the new information
5. Review the information and click on “Save” or “Cancel”

The screenshot displays the 'Alerts' management interface. At the top, a toolbar contains several icons, with the 'Alerts' icon (a speech bubble with a checkmark) highlighted by a blue circle with the number 1. Below the toolbar, the 'Alerts' section features a search bar with the text 'Name' and a 'Search' button, a 'Page size' dropdown set to '20', and buttons for 'Add New Alert' and 'Delete Selected'. A table lists three alerts:

Alert Name	Alert Type	Alert Method	Created By	Device(s)/Group	Date Created	Actions
cvvc (Crossing)	Landmark	Email HTML	RecoverTTR		03/12/2014	[Edit] [Delete]
'Car wash' Cacho				1 device(s)		[Edit] [Delete]
'Car wash' Cacho (Entering)	Geofence	Email HTML		1 device(s)		[Edit] [Delete]

The first alert, 'cvvc (Crossing)', is selected, indicated by a blue circle with the number 2. The 'Edit Alert' form is shown below the table. It includes fields for 'Alert Type' (set to 'Engine Hours'), 'Account Wide' (radio buttons for 'Yes' and 'No'), 'Add Devices' (with a link to 'view selected devices'), 'Alert Name' (set to '_AnTestEngine on PRESTGG11'), 'Every' (set to '2' hours), 'Scheduled For' (set to 'None'), and 'Except on' (set to 'None'). The 'Send Alert to:' section shows 'SMS' to '7145532029' and 'Email' to 'a@a.com', both with red 'X' icons indicating errors. A '+ add another' link is present. At the bottom, there are 'Cancel' and 'Save' buttons, with the 'Save' button highlighted by a blue circle with the number 5.
