

Edit Geofence(s)

1. Click on “Geofence” icon on the toolbar
2. Select the Geofence to be edited and click on “edit”
3. Make desired changes
4. Click on “Save” or “Cancel”

The screenshot illustrates the steps to edit a geofence in a web application. It is divided into three main sections: the toolbar, the geofence list, and the edit form.

Geofences Section:

At the top, there is a toolbar with several icons. A blue circle with the number '1' points to the 'Geofence' icon (a green circle with a white dot).

Below the toolbar is the 'Geofences' section. It includes a search bar with a 'Search' button and a 'Page size' dropdown set to '20'. To the right are buttons for 'Upload Geofences', 'Add New Geofence', and 'Geofence Groups'.

Below this is a table listing geofences:

ID	Name	Geofence group	Shape	Created By	Created At	Type	Actions
94348	civic		Circle	ttr	03/12/2014 11:37:02	DBG -	
94208	1 Testing Alert Geo 00005		Circle	qancover	01/24/2014 09:07:22	Software	
94263	1 Testing Geo Circular 000015		Circle	ttr	02/14/2014 15:15:31	Software	

A blue circle with the number '2' points to the 'edit' icon (a pencil) in the 'Actions' column of the third row.

Edit Geofence Section:

Below the table is the 'Edit Geofence' form. It has two input fields: 'Name' and 'Location'. The 'Name' field contains '1 Testing Geo Circular 000015' and the 'Location' field contains 'Doral, FL, USA'. A blue circle with the number '3' points to the 'Name' field.

Below the input fields are 'Cancel' and 'Save' buttons. A blue circle with the number '4' points to the 'Save' button.

To the right of the form is a map showing a satellite view of an area with a blue circular geofence overlaid. A blue circle with the number '3' also points to the map area.
