

Edit Geofence(s)

1. Click on “Geofence” icon on the toolbar
2. Select the Geofence to be edited and click on “edit”
3. Make desired changes
4. Click on “Save” or “Cancel”

The screenshot illustrates the steps to edit a geofence in a web application. It is divided into three main sections: the toolbar, the Geofences list, and the Edit Geofence form.

Geofences List: A table displaying the following data:

ID	Name	Geofence group	Shape	Created By	Created At	Type	Actions
94348	civic		Circle	ttr	03/12/2014 11:37:02	DBG -	
94208	1 Testing Alert Geo 00005		Circle	qancover	01/24/2014 09:07:22	Software	
94263	1 Testing Geo Circular 000015		Circle	ttr	02/14/2014 15:15:31	Software	

Edit Geofence Form: The form contains the following fields and controls:

- Name:** 1 Testing Geo Circular 000015
- Location:** Doral, FL, USA
- Buttons:** Cancel, Save

The map on the right shows a satellite view of Doral, FL, with a blue circular geofence centered on a location marked with a pin. The map includes street names like NW 41st St and NW 36th St.
